

how long will the dam stay i say give it a thousand years and no one watching some water nice will creep up a crack on its face facets and start plucking out pieces like bricks no mortar then the mosses will move over to roost up in the cranny rest spots till dribblings seep splashing through then one flood time may come a rain hail snow storm for the eons bashes a lip chips the front tooth shatters the glass fracturing the cirque into shards o i just cannot wait until the water glazes down the fall full pass again

how long will the dam stay i say give it a thousand years and no one watching some water nice will creep up a crack on its face facets and start plucking out pieces like bricks no mortar then the mosses will move over to roost up in the cranny rest spots till dribblings seep splashing through then one flood time may come a rain hail snow storm for the eons bashes a lip chips the front tooth shatters the glass fracturing the cirque into shards o i just cannot wait until the water glazes down the fall full pass again

how long will the dam stay i say give it a thousand years and no one watching some water nice will creep up a crack on its face facets and start plucking out pieces like bricks no mortar then the mosses will move over to roost up in the cranny rest spots till dribblings seep splashing through then one flood time may come a rain hail snow storm for the eons bashes a lip chips the front tooth shatters the glass fracturing the cirque into shards o i just cannot wait until the water glazes down the fall full pass again

how long will the dam stay i say give it
a thousand years and no one watching
some water will creep up a crack on
its face facets and start plucking out
pieces like bricks no mortar then the
mosses will move over to roost up in the
cranny rest spots till dribblings seep
splashing through then one flood time
may come a rain hail snow storm for the
eons bashes a lip chips the front tooth
shatters the glass fracturing the cirque
into shards o i just cannot wait until the
water glazes down the fall full pass
again

how long will the dam stay? I say give it a thousand years and no one watching some waternice will creep up a crack on its facefacets and start plucking out pieces like bricks no mortar then the mosses will mobover to roostup in the crannyrest spots till dribblings seep splashing through then one floodtime may come a rainhailsnow storm for the eons bashes a lip chips the front tooth shatters the glass, fracturing the cirque into shards o i just cannot wait until the water glazes down the fall full pass again

how long will the dam stay? I say give it a thousand years and no one watching some water and ice will creep up a crack on its facefacets and start plucking out pieces like bricks no mortar then the mosses will mob over to roostup in the cranny rest spots till dribblings seep splashing through then one floodtime may come a rain hail snow storm for the eons bashes a lip chips the front tooth shatters the glass, fracturing the cirque into shards o I just cannot wait until the water glazes down the fall full pass again

how long will the dam stay? I say give it a thousand years and no one watching some water and ice will creep up a crack on its facefacets and start plucking out pieces like bricks no mortar then the mosses will mob over to roostup in the cranny rest spots till dribblings seep splashing through. then one floodtime may come a rain hail snow storm for the eons bashes a lip chips the front tooth shatters the glass, fracturing the cirque into shards o I just cannot wait until the water glazes down the fall full pass again

How long will the dam stay? I say give it a thousand years and no one watching some water and ice will creep up a crack on its facefacets and start plucking out pieces like bricks no mortar then the mosses will mob over to roostup in the cranny rest spots, till dribblings seep splashing through then one floodtime may come a rain hail snow storm for the eons bashes a lip chips the front tooth shatters the glass fracturing the cirque into shards, o I just cannot wait until the water glazes down the fall full pass again

how long will the dam stay? I say give it a thousand years and no one watching. Some water and ice will creep up a crack on its facefacets and start plucking out pieces like bricks no mortar then the mosses will mob over to roostup in the cranny rest spots, till dribblings seep splashing through then one floodtime may come a rain hail snow storm for the eons bashes a lip chips the front tooth shatters the glass. Fracturing the cirque into shards, o I just cannot wait until the water glazes down the fall full pass again

how long will the dam stay? I say give it a thousand years and no one watching, some water and ice will creep up a crack on its facefacets and start plucking out pieces like bricks no mortar. Then the mosses will mob over to roostup in the cranny rest spots, till dribblings seep splashing through. Then one floodtime may come a rain hail snow storm for the eons bashes a lip chips the front tooth shatters the glass, fracturing the cirque into shards. O I just cannot wait until the water glazes down the fall full pass again

How long will the dam stay? I say give it a thousand years and no one watching, some water and ice will creep up a crack on its facefacets and start plucking out pieces like bricks no mortar. Then the mosses will mob over to roostup in the cranny rest spots, till dribblings seep splashing through, then one floodtime may come a rain hail snow storm for the eons. Bashes a lip chips the front tooth shatters the glass, fracturing the cirque into shards, O, I just cannot wait until the water glazes down the fall full pass again

how long will the dam stay, i say, give it a thousand years and no one watching. some water and ice will creep up a crack on its facefacets and start plucking out pieces like bricks no mortar. then the mosses will mob over to roost up in the cranny rest spots, till dribblings seep splashing through, then one flood time may come a rain hail snow storm for the eons. bashes a lip chips the front tooth shatters the glass, fracturing the cirque into shards, o, i just cannot wait until the water glazes down the fall full pass again

How long will the dam stay? I say, give it a thousand years and no one watching. Some water and ice will creep up a crack on its face; facets; and start plucking out pieces like bricks, no mortar. then the mosses will mob over to roost up in the cranny rest spots, till dribblings seep splashing through, then one flood time may come a rain, hail, snow storm for the eons; bashes a lip, chips the front tooth shatters the glass, fracturing the cirque into shards. O, I just cannot wait until the water glazes down the fall full pass again.

How long will the dam stay? I say, give it a thousand years and no one watching. Some water and ice will creep up a crack on its face; facets; and start plucking out pieces like bricks, no mortar. Then the mosses will mob over to roost up in the cranny rest spots, till dribblings seep splashing through. Then one flood time may come a rain, hail, snow storm for the eons; bashes a lip, chips the front tooth, shatters the glass, fracturing the cirque into shards. O, I just cannot wait until the water glazes down the fall full pass again.

How long will the dam stay? I say, give it a thousand years and no one watching. Some water and ice will creep up a crack on its face; facets; and start plucking out pieces like bricks, no mortar. Then the mosses will mob over to roost up in the cranny rest spots, till dribblings seep, splashing through. Then one flood time may come a rain, hail, snow storm for the eons; bashes a lip, chips the front tooth, shatters the glass, fracturing the cirque into shards. O, I just cannot wait until the water glazes down the fall, full pass again.

How long will the dam stay? I say: give it a thousand years and no one watching. Some, water and ice, will creep up a crack on its face; facets; and start plucking out pieces like bricks, no mortar. Then the mosses will mob over to roost up in the cranny rest spots, till dribblings seep, splashing through. Then one flood time may come a rain, hail, snow storm for the eons; bashes a lip, chips the front tooth, shatters the glass; fracturing the cirque into shards. O, I just cannot wait until the water glazes down the fall, full pass again.

How long will the dam stay? I say: give it a thousand years and no one watching. Some, water and ice, will creep up a crack on its face; facets; and start plucking out pieces like bricks, no mortar. Then - the mosses will mob over to roost up in the cranny rest spots, till dribblings seep, splashing through. Then one flood time may come a rain, hail, snow storm for the eons; bashes a lip, chips the front tooth, shatters the glass; fracturing the cirque into shards. O! I just cannot wait until the water glazes down the fall, full pass again.

How long will the dam stay? I say: give it a thousand years and no one watching. Some, water and ice, will creep up a crack on its face; facets; and start plucking out pieces like bricks, no mortar. Then - the mosses will mob over to roost up in the cranny rest spots, till dribblings seep, splashing through. Then - one flood time may come a rain, hail, snow storm for the eons; bashes a lip, chips the front tooth, shatters the glass; fracturing the cirque into shards. O! I just cannot wait - until the water glazes down the fall, full; pass again.

How long will the dam stay? I say: give it a thousand years and no one watching. Some water and ice will creep up a crack on its face; facets; and start plucking out pieces like bricks, no mortar. Then! the mosses will mob over to roost up in the cranny rest spots, till dribblings seep, splashing through, then! one flood time may come a rain, hail, snow storm for the eons; bashes a lip chips the front tooth shatters the glass; fracturing the cirque into shards. O! I just cannot wait - until the water glazes down the fall, full; pass again.

How long will the dam stay? I say: give it a thousand years and no one watching. Some, water and ice, will creep up a crack on its face; facets; and start plucking out pieces like bricks, no mortar. Then! the mosses will mob over to roost up in the cranny rest spots, till dribblings seep, splashing through. Then! one flood time may come a rain, hail, snow storm for the eons; bashes a lip, chips the front tooth, shatters the glass; fracturing the cirque into shards. O! I just cannot wait! until the water glazes down the fall, full; pass again.
